

Application

savENRG® FREEZER Packs are designed and manufactured for maintaining products frozen below -5°C (23°F) during transportation.

Instructions:

1. Set the freezer at or below -15°C (9°F). Place the FREEZER Packs flat on a tray. Check for leaks while the packs are in a liquid state. Dispose of any leaky packs.
2. Position the tray in the freezer. Multiple trays can be conditioned at the same time as long as there is adequate and unblocked air circulation around the surface of the FREEZER Packs.
3. Allow the FREEZER Packs to charge for at least 48 hours before use. The FREEZER Packs must feel completely solid after conditioning. The duration of charging will depend on the freezer's power capacity and loading of FREEZER Packs.
4. Prepare the shipping box for pack-out. Pack-out instructions to be established by the user.
5. The pack-out and labeling operations should be executed in a controlled room temperature environment not exceeding 18°C (68°F).
6. After pack-out, hold the shipping boxes in the temperature-controlled room until they are ready for pickup.

CAUTION

DO NOT boil the FREEZER Packs.

DO NOT microwave the FREEZER Packs. Excessive heating can lead to over expansion or contraction of the product and may damage the FREEZER Pack.

Take additional caution while handling the conditioned FREEZER Packs.

DO NOT drop the pack after conditioning as the impact may damage the FREEZER Pack.

HANDLE WITH CARE. Check for leaks when the packs are in a liquid state. Dispose of any leaky packs as per instructions.

*Disposal Instructions: This product is water based with a mixture of salts. It is non-toxic and non-flammable. Please refer to the product SDS for detailed instructions on disposal, containment of spills, inhalation, contact with skin, eyes, or ingestion.
